QUIZ KIDS

Have a go at these fun puzzles from *Quiz Kids* magazine. Why not colour in the page once you've finished?

To solve these Sudoku puzzles, you need to write numbers in the squares so that every row, column and thick-lined square contains each of the numbers 1, 2, 3 and 4. (Rows go across and columns go down.) So in the row shown by the arrow, the numbers 3 and 4 are missing, but can you work out which number goes in which square? Remember, you cannot have two of the same number in any row, column or thick-lined square. See if you can fill in all three Mini Sudoku grids.
